Carlow University Counseling Services

Carlow University Counseling Services seeks to create and sustain a campus environment that supports the holistic development of each student and contributes to their optimal success by facilitating and supporting identity development, health and wellness, community responsibility, multicultural awareness and social justice.

Our center serves the Carlow community by providing individual and group counseling/psychotherapy, seminars and workshops, consultation, outreach, and referral. Additionally, our part-time psychiatrist provides short term medication management for students who are actively engaged in counseling.

We are currently offering a two semester internship for master’s level social work students. Practice areas include initial assessments, short term mental health counseling, crisis intervention, case management and referral. Interns will also help facilitate mental health related outreach and wellness programming.

This is a fantastic opportunity for a student to develop her or his clinical skills while learning about a wide range of issues relevant to the college population, as well as gaining administrative experience by assisting with our center’s operations.

Desired Qualifications:

We are seeking an intern who can commit to both the Fall and Spring semester in order to provide continuity in care, and to ensure the accrual of required direct hours. Our counseling center is set up much like a private practice, and it can initially take some time for our interns to develop a viable caseload. The chosen candidate will have an opportunity to facilitate individual counseling, group psychoeducational workshops, and provide case management and educational outreach to our students, among other possibilities.

The candidate must have foundational counseling skills, including the ability to perform clinical intakes and crisis intervention, under supervision. Further, the candidate must demonstrate an understanding of the ethical guidelines of the profession, sensitivity to multiculturalism, professionalism, and a commitment to client confidentiality. The intern should be willing to collaborate with other departments such as Health, Disability, and Career Services.

Our office is open from 9AM to 4:30PM Monday through Friday. Some flexibility with schedule is preferred to accommodate our students, as well as a willingness to attend occasional meetings and other events as needed.

The intern will be supervised by a licensed professional counselor in addition to receiving weekly group consultation with our psychiatrist and other professionals.
