Children’s Hospital Child Advocacy Center

Children’s Hospital Child Advocacy Center is a hospital based Child Advocacy Center that services approximately 600 children a year for forensic interviews and approximately 1200 children for medical assessments a year due to allegations of abuse and neglect. The Child Advocacy Center works closely with medical providers, child welfare professionals, law enforcement, victim’s advocacy and multiple community partners. An intern will experience the forensic interview process, gain a vast medical knowledge (including insight to hospital based social work), a comprehensive view of the child welfare and legal system while interacting with families involved with the Child Advocacy Program. All interns must complete a medical clearance and have current child abuse clearances (ACT 33, Act 34 and Act 73).
