UPMC Living-at-Home/Staying-At-Home Program

Develop skills in providing assessment, treatment, and coordination of resources to clients and families. Learn to facilitate resolution of problems related to environmental needs, interpersonal conflict, physical illness and mental illness using a variety of treatment modalities including individual, family, and group counseling, short-term therapy, crisis intervention, and bereavement counseling. Learn to assist clients and their caregivers in adjusting to episodes of acute and chronic illness; in coping with lifestyle changes precipitated by the illness/disability, and in addressing issues of terminality. Developing expertise in clinical social work practice relative to geriatrics.
