Carnegie Mellon University Health Services’ professional staff provides high-quality care in an open and safe setting to all enrolled students. We offer medical care, health promotion and insurance services, including: allergy shots, blood tests, illness and injury visits, massage therapy, nutrition counseling, prescription medicines, sexual health services, stress management support, student health insurance, substance use assessments, quit smoking support, and well visits.

The social work intern will serve in the Health Promotion department within University Health Services. Health promotion is the process of enabling people to increase control over and improve their health. We are here to help Carnegie Mellon students, staff, and faculty get and stay healthy. We do this through individual clinical services, health education programs, and campus initiatives.

Responsibilities for Substance Abuse Intern:
