Behavioral Consultant
Behavioral consultation services consist of clinical direction of behavioral services to a child, youth or young adult; development and revision of the individual treatment plan (ITP) based on the written order and assessment; oversight of the implementation of the ITP and transfer of skills; gathering and analyzing data to evaluate the effectiveness of the ITP; and, consultation with a child’s, youth’s or young adult’s treatment team regarding the ITP. Behavior consultation treatment modalities include, but are not limited to, behavior modification strategies (i.e. reinforcement and consequence programs, time-out procedures, role-play, social skill development, parent training, crisis intervention and management techniques, time-structuring activities, and problem solving techniques).

Mobile Therapist
Mobile therapy services consist of individual therapy, family therapy, development and revision of the ITP; and, assistance with crisis stabilization and assistance with addressing problems the child, youth or young adult has encountered. Mobile therapy treatment modalities include, but are not limited to, cognitive-behavioral therapy, dialectical behavioral therapy, experiential therapy, humanistic therapy, person-centered therapy, interpersonal therapy, problem-solving therapy, and family-focused therapy.

Behavioral Health Technician
Behavioral health technician services consist of implementing behavioral methods and interventions from the ITP. Treatment modalities implemented by the BHT will be determined by the goals, methods, and interventions documented in the ITP.

Located in Monroeville, which is just 20 minutes East of Pittsburgh, Nisar mainly serves clients who reside in Allegheny County.
